

Maintain Filters For Good Indoor Air Quality and Efficiency

Optimize the performance of your HVAC system while running at the lowest operating costs with proper filter maintenance.

Did You Know?

By conducting the following at regular intervals you can be sure your HVAC system is running as cost effective and efficient as possible:

1. Develop a proper maintenance program for all of your equipment
2. Inspect replace or clean your filters at the proper intervals for your facility
3. Check manufacturer's recommended final resistance
4. Check filter resistance regularly and maintain a log
5. Clean plenum floors with every filter change
6. Replace defective or damaged filters at once
7. Check gaskets to avoid dirty air bypass

For more information on proper filter maintenance or ways to maximize your HVAC efficiency, please contact Steve Lester at stewel@jacco.com, or visit our website at www.jacco.com.
