## HVAC Systems for the Breakers Express Hotel at Cedar Point Provided by Jacco

*Jacco & Associates is proud to have provided the HVAC systems for the renovation and addition at the Breakers Express Hotel at Cedar Point.*

Aon's compact V3 air handling units were installed to provide 100% outside air for ventilation to the rooms, common areas and hallways.

The compact design allowed them to fit within

tight mechanical spaces in the existing building. [The V3 units](#) were partnered with [Aeon CF](#) condensing units that included digital scroll compressors for energy efficiency.

**Samsung's DVMS Variable Refrigerant Flow Systems** now provide heating and cooling to the corridors and lobby. Each of the 12 heat pumps include two variable speed compressors for system redundancy when providing refrigerant to the 65 cassette fan coil units installed in the space.

Samsung's industry-leading SCHE (Simultaneous Cooling & Heating Efficiency) rating helps keep the owner satisfied while the modulating compressors, condenser fans, and expansion valves keep the tenants happy and comfortable.
