

## Make a Splash with AAON Pool Units

**Did you know Jacco & Associates offers pool units for recreation centers and natatoriums?**

Jacco recently equipped a private residence in Northeast Ohio with a 20-ton AAON geothermal indoor packaged pool unit.

Pool units are unique, as they must withstand corrosion. This AAON system is internally coated with a 2,500 hour salt spray paint, covering all items that come into contact with the corrosive air from the pool area. The coils are also coated with a polymer coating to give them the same protection. The modulating compressors with a modulating hot gas reheat coil provide the necessary dehumidification and temperature control for a comfortable environment and efficient operation.

This unit is vertically oriented, taking up minimum floor space while providing excellent serviceability.

Whether you are designing or constructing a residential pool, hotel pool, recreation center or natatorium, Jacco can help you find the perfect AAON solution.

Jacco will be hosting a series of Seminars throughout 2017!

Click here to join us on SEPTEMBER 13 to learn more about Building Pressures/Demand Control Ventilation

**Did you know the new AAON R&D Lab will have testing capabilities from -20°F to 140°F temperature, up to 8 inches per hour rain, up to 2 inches per hour snow and up to 50 mph wind? Those are some EXTREME conditions!**

For more information please contact Jerry Cohen, or visit our website.
