

Jacco Contributes to Renovation in the Higbee Building for Quicken Loans new-breed business

Quicken Loans has remodeled the historic Higbee building in downtown Cleveland to meet the demands of their recent expansion. Jacco was lucky enough to be a part of this remodeling project by supplying new HVAC equipment.

Because of the available space in the building we had to ship unassembled systems to later be constructed to match the existing structure.

5 AAON Water Cooled Dedicated Outdoor Air Systems were needed to accommodate the buildings HVAC needs. These systems work great when you need temperature and humidity control in large areas. They make use of 100% outdoor air, and then adjust humidity and temperature based on the climate of the room. Not only is this efficient, but

also very comfortable in any season.
